

Regarding FCC ID: 2ALGWRJSS3B, ISED: 22498-RJSS3B
Soloshot3 Base

Compliance with FCC 15. 247 (g)

The Soloshot3 Base uses industry-standard protocols that are designed to comply with the technical requirements of 15.247(g) and (h). That is, the system complies with the requirements when presented with a continuous stream of data. The system also satisfies the definition of a FHSS and distributes its transmissions over the minimum number of hopping channels. By design, the system is enabled to employ 78 channels.

The Soloshot3 Base employs intelligence to avoid channels that are already occupied by other carriers.

Pursuant to the guidance provided by the FCC in 594280 D01 Configuration Control v02r01, Channels 12 and 13 in the WiFi band in the 2.4 GHz radio are not enabled for US customers. End-users cannot enable these channels by user input.
